Response to Arguments

1. Applicant's arguments, see remarks on pages 7 and 8, filed April 24, 2010, with respect to claims 22-45 have been fully considered and are persuasive. The 103(a) rejections of claims 22-45 been withdrawn.

4. The following is an examiner's statement of reasons for allowance:

As to claim 22, the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the through flow volume of an outlet valve provided in the outlet vessel is regulated by the controlling and evaluating unit; and wherein the controlling and evaluating unit determines components and concentrations of substances contained in the sample, and regulates the through-flow of the outlet valve based on the determined components and concentrations of the substances contained in the sample as clearly shown, in combination with the rest of the limitations of the claim.

As to claim 31, the prior art of record, taken alone or in combination, fails to disclose or render obvious conveying the measurement results for further processing to a controlling and evaluating unit which determines components and concentrations of substances contained in the sample based on stored specific calibrations as clearly shown, in combination with the rest of the limitations of the claim.

And as to claim 40, the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein a control signal is generated by the controlling and

evaluating unit based on the determined components and concentrations of substances contained in the sample, and is used to regulate the flow through an outlet valve of the outlet line of the vessel as clearly shown, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Reference **5,042,293** discloses a determination of the concentration of a particular ion in a liquid at concentration levels on the order of, typically, one-thousandth the concentration of the same ion in a standard solution.

However, it fails to disclose the limitations cited above in claim 22 in reference to the controlling and evaluating units above.
